

EPIDEMIOLOGY POST-DOC POSITION IN BARCELONA, SPAIN

at Center for Research in Environmental Epidemiology - CREAL

Advisor: Nino Kuenzli

Entry: any time

The new Center for Research in Environmental Epidemiology, CREAL – www.creal.cat – looks for a post-doc.

If you are interested in asthma, COPD, and/or atherosclerosis and the long-term effects of ambient air pollution on these chronic pathologies, this may be of interest for you. The position may include an active role in ongoing studies, opportunities to initiating new projects, analyzing existing data, and/or taking a leading role in international collaborative studies. A strong background in epidemiology, experience in air pollution research, environmental epidemiology, and/or etiologic research of the above mentioned chronic diseases are welcome assets.

We expect good writing and communication skills in English. Good knowledge of a local language (such as Spanish and/or Catalan) is an advantage.

You will be part of an active multidisciplinary international team. You will mostly work in the vibrant city of Barcelona. Your office will be in the new biomedical research park www.prbb.org.

Please send your CV and application letter/email to Nino Kuenzli – kuenzli@imim.es.

Nino Künzli, M.D. Ph.D.

ICREA Research Professor
